Better Built for Unsurpassed Temperature Control

New 27 cu. ft. Capacity

Holds more fresh food than a 29 cu. ft. competitive French door model.* Extra shelves and bins create additional room for an efficient use of space.

New Flush Dispenser with LCD Color Touch Screen

Style meets function with easy-to-use temperature controls, a power outage indicator and a door alarm. Precisely fill even wide containers with the perfect amount of water in ounces, cups or liters using Measured Fill.

New Store-N-Door® Dispensing System

This refrigerator features the industry's largest available in-the-door ice bin capacity,** a see-through window and LED lighting. The easy-to-remove bin located in the door opens up extra interior shelf space and gives better accessibility.

*Based on shelf and door bin surface area.
**Among French door refrigerators with ice bins in the door.

New High-Efficiency Compressor

When combined with Rapid React sensors and the patented door seal, this compressor reduces large temperature fluctuations to keep food fresh and ice frozen.

New Interior LED Lighting

Improved lighting inside the refrigerator and ice bin provides a brighter interior for easy viewing and produces less heat than incandescent bulbs.
